

# Cosmetic Tattooing – Eyebrows

## **The Look**

Modern brow tattoos are a great option for people with compromised, thinning or sparse brows.

They are designed to enhance your natural look, not make your brows look heavily filled in.

The method we use is called *Ombré*. It creates a soft powdered look on the skin.

Tattooing is *two-dimensional* – it sits flat within the skin, whereas brow hair is *three-dimensional* – it sits up on top of the skin. There will always be a distinction between them close-up.

## **The Process**

Eyebrow tattooing is a two-step process. During the first session (3-4 hours) we map out your shape with your facial structure, making sure to not create emphasis on ageing areas of a natural brow. We chose the colour based on consultation and your natural hair/skin colour. The second session will be 8-12 weeks later to boost the colour and sharpen the shape, as the colour can fade up to 80% after the first session.

Sometimes a third session might be needed depending on how your body metabolizes the tattoo pigment.

## **Maintenance**

Modern eyebrow tattoos are semi-permanent. The pigment used is designed to fade over the years and everyone's skin metabolizes it differently. Maintenance appointments may be needed approximately every 12 months to 2 years to keep the shape sharp and colour fresh.

## **Restrictions**

Tattooing is strictly for people over the age of 18. Photo ID is required. We cannot allow anyone else in the room during your appointments as nobody wants their tattooist distracted!

After having any tattoo you cannot donate blood for 6 months.

Scars can be tricky to implant tattoo pigment in and you cannot have brow tattoos if you are prone to keloid scarring. Tattooing is not safe if you're pregnant or breastfeeding. Tattooing cannot be done until 6 weeks or up to 12 months after the use of some acne medications, immune suppressors, anti-inflammatories and steroids, and not at all with some medications.

## **Things to Note**

You will be provided with aftercare advice that must be strictly followed and caffeine/alcohol must be avoided in the 24hrs before and after your appointment. Brow hair may be waxed/plucked in your appointment, this will grow back as normal. **Tattooing doesn't stop the need for waxing and tinting** if your hairs are light and grow outside the shape.

We do not perform microblading/feathering/hair-stroke brows (these methods are all the same) as it is phasing out of popularity and cannot be repeatedly touched-up when the colour fades.

We won't tattoo your brows if you request a shape/colour very different to your natural features – We reserve the right to refuse treatment for any reason.

## **Appointments**

A consultation is required before booking a tattoo. During your consult we may tint and wax your brows.

A booking fee of 50% is required to secure your tattoo appointment. This is non-refundable if you cancel with less than 48hrs notice, for any reason.

## **Prices after 1<sup>st</sup> July 2024 until end of 2024**

Consultation (required) \$60

Initial Tattoo Session \$399 (-redeem consult price)

Touch-up Session (required, 6+ weeks later) \$199

# Cosmetic Tattooing – Eyebrows

## **Before Your Tattoo**

Avoid caffeine and alcohol in the 24hrs leading up to your appointment.

It's recommended to wash your hair the day/night before your appointment, as you cannot get your brows wet for a week after having them tattooed.

Do not wear makeup to your tattoo appointment/s.

## **Aftercare**

You will be provided with a detailed aftercare card following each session.

### Initial Session Aftercare

For the first 48hrs you must keep wiping your brows with clean damp cotton rounds to stop any fluid building up. This is a normal part of the healing process and wiping will prevent a thick scab from building up.

For the first week you must apply the provided aftercare gel morning and night. Don't get your brows wet and do not apply any other products or makeup. Avoid caffeine, alcohol, and excessive sweating as much as possible.

For the first month no touching, scratching or picking! If your brows form a light scab at all, let it fall off naturally.

In approx. 6-8 weeks have your 2nd appointment (tattoo touch-up) to define the shape and deepen the colour if needed, as it will lighten up to 80% after healing from the initial session.

### Touch-up Session Aftercare

Follow the aftercare advice as above.

When fully healed (6 weeks+)

Apply SPF daily, always. It is okay to have your brows waxed/tinted as desired after this time.

After 12-24months you can have your tattoo refreshed, if required, to keep the colour full and shape defined.
